Did you know?

Canada is becoming increasingly diverse culturally. The world is coming to our cities!

SOCIOLOGY AT CRANDALL

When you study for a degree in Sociology at Crandall University, you take an objective look at society and explore the many diverse dimensions of human relationships, uncovering patterns in our relationships. From urban gang culture to changing rural communities, the variety we examine is as broad as the world in which we live.

A degree in Sociology will help you gain critical skills of observation and analysis and learn to communicate well both verbally and in writing. You will receive a strong grounding in social science methodology and theory that will equip you for your future in graduate school or in any number of social service positions.

Altogether, your coursework will enhance your appreciation for the diversity of humankind. Classes are rigorous, but the rewards include nothing less than a better understanding of the social world in which we live.

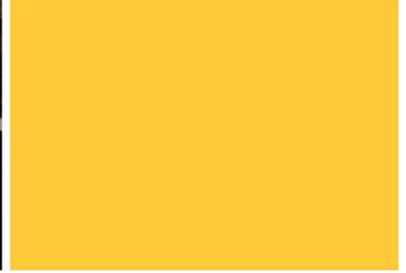

What to expect when you graduate

A degree in Sociology is an excellent liberal arts foundation that prepares you for any number of career directions and graduate studies. Past graduates have gone on to careers in education, ministry, social services, police and international relations.

Special Program Highlights

- Forge strong ties with your professors who work closely with you to explore the many fascinating nuances of human behaviour and interaction.
- Undertake an internship during your degree in Sociology - work in community organizations such as youth centers, mental health homes, and homeless shelters or even arrange for an overseas internship experience.
- Join the Sociology Society that arranges fun group activities as well as providing service to food banks, missions, and groups like Big Brothers and Big Sisters.
- Learn to think and live in new ways that are sensitive to our increasingly culturally and socially diverse world.

Bachelor of Arts in Sociology

Interesting Courses You May Take

Perspectives on Poverty – Students are introduced to current research and theory on poverty, the interplay between structural and personal causes of poverty and the personal experience of poverty in Canada. The course examines the multiple systems that intersect with poverty including family, school, health care and criminal justice. Assumptions about social problems are challenged.

Deviant Behaviour – Explore the various forms of behaviour that are considered deviant in society. A particular emphasis is placed on how sociology attempts to explain and understand these behaviours.

Modern Life and Personal Identity – Discover how personal family history and modern Canadian culture shape an understanding of personal identity. The course familiarizes students with larger social trends in the last century in the West and helps them discover how these trends have influenced family history and them personally.
